# OUTFITTING WORKERS WITH SAFETY GLOVES IS ALL IN YOUR HANDS

Tyndale's fully managed glove program efficiently manages spending, provides internal tracking of purchases, and delivers cost control to corporate safety management. Tyndale works closely with some of the largest glove distributors to offer over 100 styles of protective work gloves. Brands like Stauffer, Youngstown Gloves, and more, allow Tyndale to stock a variety of cut resistant, arc rated, fire resistant, protective gloves.

## HOW IT WORKS

Implementing a glove program is as easy as contacting your dedicated Tyndale Account Management Team to ask about our glove options. Your Account Management Team works with you to help determine which flexible Tyndale program best suits your needs. Tyndale then customizes a glove catalog making it easy for your employees to choose from your management-approved selection of protective work gloves. Simply add gloves alongside FRC as part of your existing program, or create a separate catalog with a separate allotment or allowance for gloves—it's your choice!

## WHY YOUR EMPLOYEES NEED PROTECTIVE WORK GLOVES:

1. Prevent puncture wounds
2. Provide protection from chemical burns and injuries
3. Protection against thermal hazards
4. Prevent absorption of hazardous substances
5. Prevent cuts and burns
6. Prevent loss of fingers and hands

## GET STARTED TODAY!

Let Tyndale manage your worker glove program – it's simple and easy to get started.

- Implement your new glove program - save money, cut down the amount of gloves used by each employee, and eliminate internal tracking of glove allowances
- Establish your company's specific glove requirements and budget
- All items we sell are vetted for compliance with ASTM F2992, ASTM D6413, and ASTM F2675/F2675M industry standards and backed by our warranty and 35+ years of industry experience
